

# NEW LIFE PROJECT: THE COURSES

Workshop at AMATYC conference  
November 9, 2012 session W08

Jack Rotman, and DMC team  
(DMC  Developmental Mathematics Committee)

# OUTLINE OF WORKSHOP

- Introductions (who we are)
- Overview of New Life Model
- Mathematical Literacy for College Students (MLCS): Purposes; List of learning outcomes; Sample Lessons
- Algebraic Literacy (AL): Purposes; List of learning outcomes; Sample lesson
- Wrap-up

# INTRODUCTIONS

- ◉ Jack Rotman, New Life Project Leader
- ◉ “New Life” is a Subcommittee of the DMC
- ◉ Subcommittee members helping today:

**Julie Phelps\***

**Janet Teegarden\***

**Kathy Almy\***

**Robert Cantin**

**Brian Mercer**

\* indicates part of original design team \*

- ◉ Friends helping today

**Dayna Ford**

**Billye Cheek**

(from Grayson County College, TX)

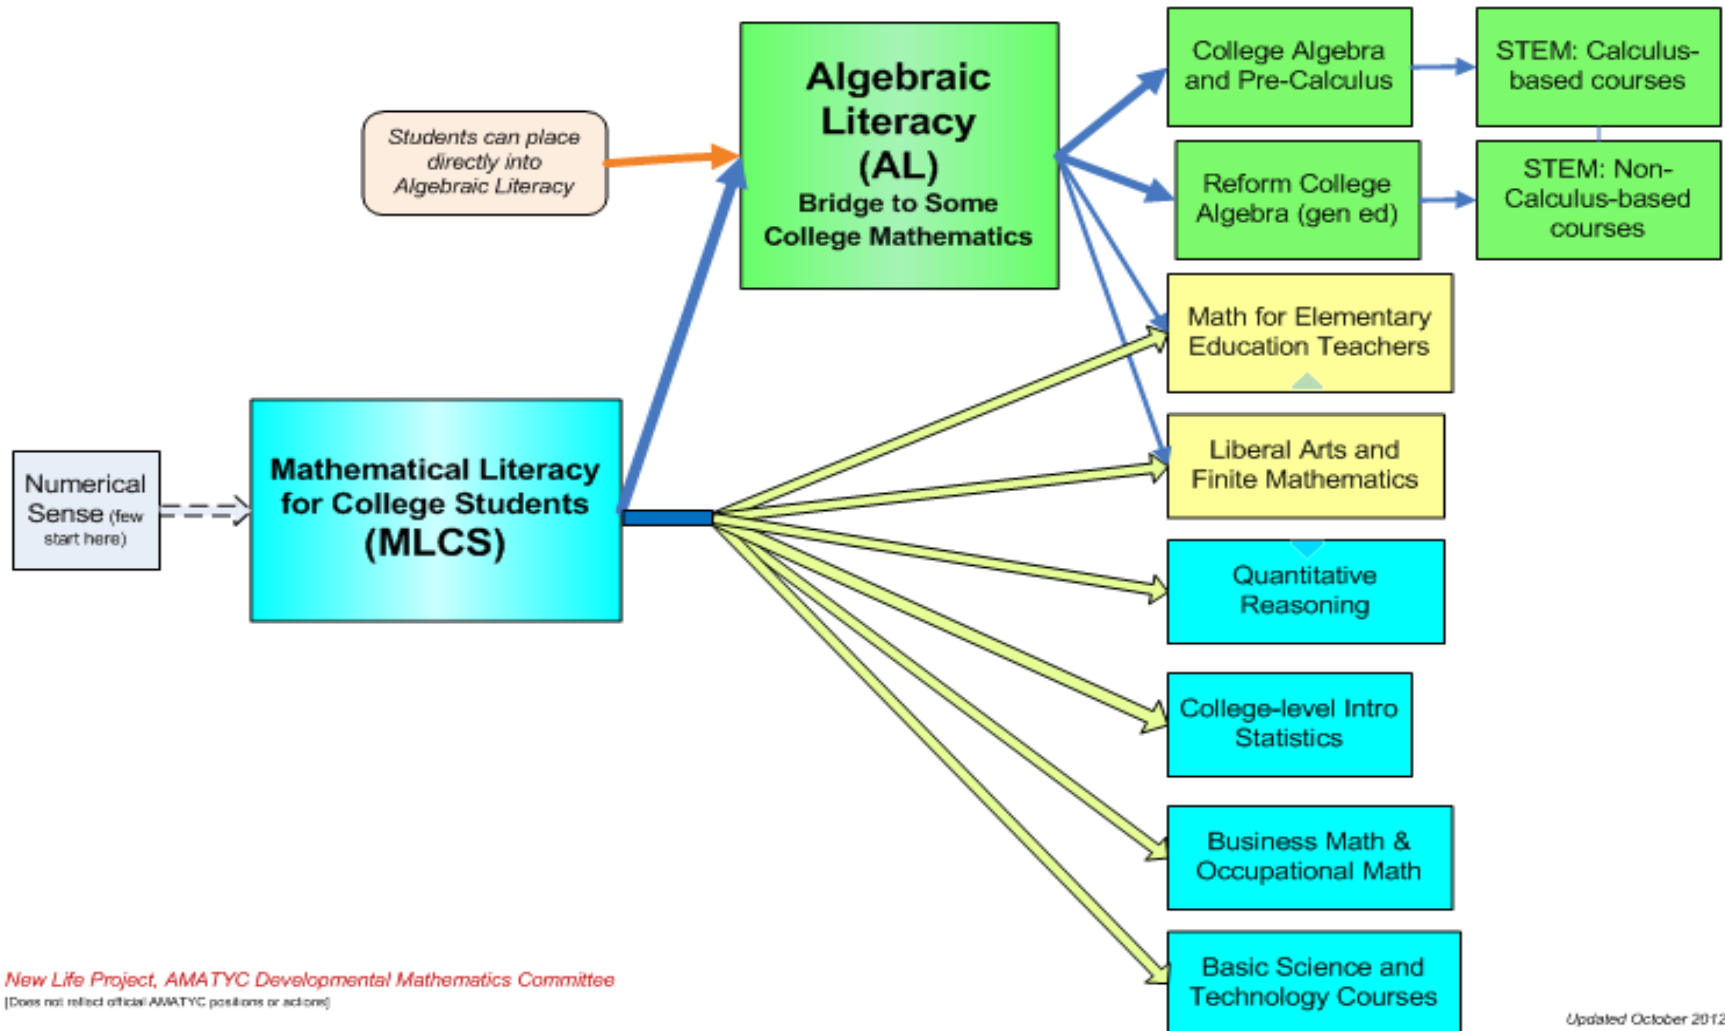

# OVERVIEW OF NEW LIFE MODEL

- Grounded in four legacies: (1) both AMATYC Crossroads (2) College Algebra reform (MAA); (3) Partner discipline needs (MAA); (4) Numeracy & QL movements
- Focused on needs of community college students
- Important mathematics for all students
- Fewer math courses for almost all students

# OVERVIEW OF NEW LIFE MODEL: VISUAL

**New Vision of Mathematics Pathways: Fewer non-credit math courses for most students**

from the New Life Project

*New Life Project, AMATYC Developmental Mathematics Committee*  
[Does not reflect official AMATYC positions or actions]

Updated October 2012

# MORE THAN NEW CONTENT

- ◉ This workshop will focus on the content of MLCS and AL
- ◉ The New Life model calls for diverse and deliberate methods of teaching ...
- ◉ and the model calls for us to build student success capabilities concurrently ...
- ◉ along with building the profession (networking, validating, researching, etc)

# COURSE OUTCOMES

- ◉ Documents from New Life work teams
- ◉ Each course has 4 goal areas connected to student needs
- ◉ Course structure is not intended to be based on the 4 goal areas
- ◉ Each course has more outcomes than would normally fit in a class: local adaptations are needed
- ◉ Publishers are involved with book projects

# MLCS: PURPOSES

- ◉ Alternative to Beginning Algebra
  - ◉ Very limited prerequisites to MLCS
  - ◉ **Focus on general education**
  - ◉ Prepares students for gen ed math courses such as quantitative reasoning, intro statistics, and liberal arts math; and ...
  - ◉ Prepares students for Algebraic Literacy (2<sup>nd</sup> course) or intermediate algebra
- << Get MLCS goals & outcomes document >>*

# SMALL GROUP ACTIVITY 1 *(12 MINUTES)*

- ◉ Select one goal (such as Functions)
- ◉ Look at outcome statements in detail for 5 minutes (individually or group)
- ◉ Identify as a group how these outcomes differ in general ways from your beginning algebra course
- ◉ List two questions your group has about the general intent of the outcomes in this goal

# REPORTING OUT: MLCS OUTCOMES

- How do the MLCS outcomes differ from beginning algebra?
- Questions on general intent?

## SMALL GROUP ACTIVITY 2 (12 MINUTES)

- ◉ Sample of MLCS curriculum - Math Lit

- ◉ See lesson 2.12

3 copies at each table; also available online at

<http://dm-live.wikispaces.com/workshop2012>

- ◉ Read through the lessons *5 minutes*

- ◉ Discuss how this differs from traditional class

# REPORTING OUT: MATH LIT SAMPLES

- How do the Math Lit lessons differ from traditional algebra course?
- Questions which arose in conversation?

## SMALL GROUP ACTIVITY 3 (12 MINUTES)

- ◉ Sample of MLCS curriculum - Quantway

- ◉ See lesson 4.1.3

3 copies at each table; also available online at

<http://dm-live.wikispaces.com/workshop2012>

- ◉ Read through the lesson *5 minutes*

- ◉ Discuss how this differs from traditional class

# REPORTING OUT: QUANTWAY SAMPLE

- ⦿ How does the Quantway lesson differ from traditional algebra course?
  
- ⦿ Questions which arose in conversation?

# AL: PURPOSES

- ◉ Alternative to Intermediate Algebra
  - ◉ Prerequisite: from MLCS or beginning algebra
  - ◉ **Blend of general education and STEM**
  - ◉ Prepares students for STEM-type math courses and general science; and ...
  - ◉ Bridge to pre-calculus courses
- << Get AL goals & outcomes document >>*

## SMALL GROUP ACTIVITY 4 *(12 MINUTES)*

- ◉ **Select one goal (such as Functions)**
- ◉ Look at outcome statements in detail for 5 minutes (individually or group)
- ◉ Identify as a group how these outcomes differ in general ways from your intermediate algebra course
- ◉ List two questions your group has about the general intent of the outcomes in this goal

# REPORTING OUT: AL OUTCOMES

- How do the AL outcomes differ from intermediate algebra?
- Questions on general intent?

## SMALL GROUP ACTIVITY 5 (12 MINUTES)

- ◉ Sample of AL curriculum - draft document

- ◉ See lesson 4.x

3 copies at each table; also available  
online at

<http://dm-live.wikispaces.com/workshop2012>

- ◉ Read through the lessons *5 minutes*

- ◉ Discuss how this differs from traditional  
class

# REPORTING OUT: AL SAMPLE (DRAFT)

- How does the AL lesson differ from traditional algebra course?
- Other questions that arose?

# WRAPPING UP

- ◉ Talk with one of us about doing New Life at your college
- ◉ Join the online community (<http://dm-live.wikispaces.com>)
- ◉ Network with other faculty and colleges in your state and region
- ◉ Email Jack Rotman at [rotmanj@lcc.edu](mailto:rotmanj@lcc.edu)
